How to use a QR Code Frame

1.

PICK YOUR FRAME

This set contains several QR Code Frames, each of which is available in PNG or EPS file format. You can preview all frames by opening the "Samples.pdf" file. Once you have decided on your favorite frame, simply pick it from the EPS or PNG folders according to the file format you prefer.

2.

PUT YOUR QR CODE AND FRAME TOGETHER

Open your QR Code and your favorite Frame with any graphic program, such as Paint, Gimp or Illustrator. Put your Code right into the marker of your Frame while keeping a small white border around your Code as shown on the image below. When you're done, ideally save your result as PNG or any vector-based file format to maintain high quality.

3.

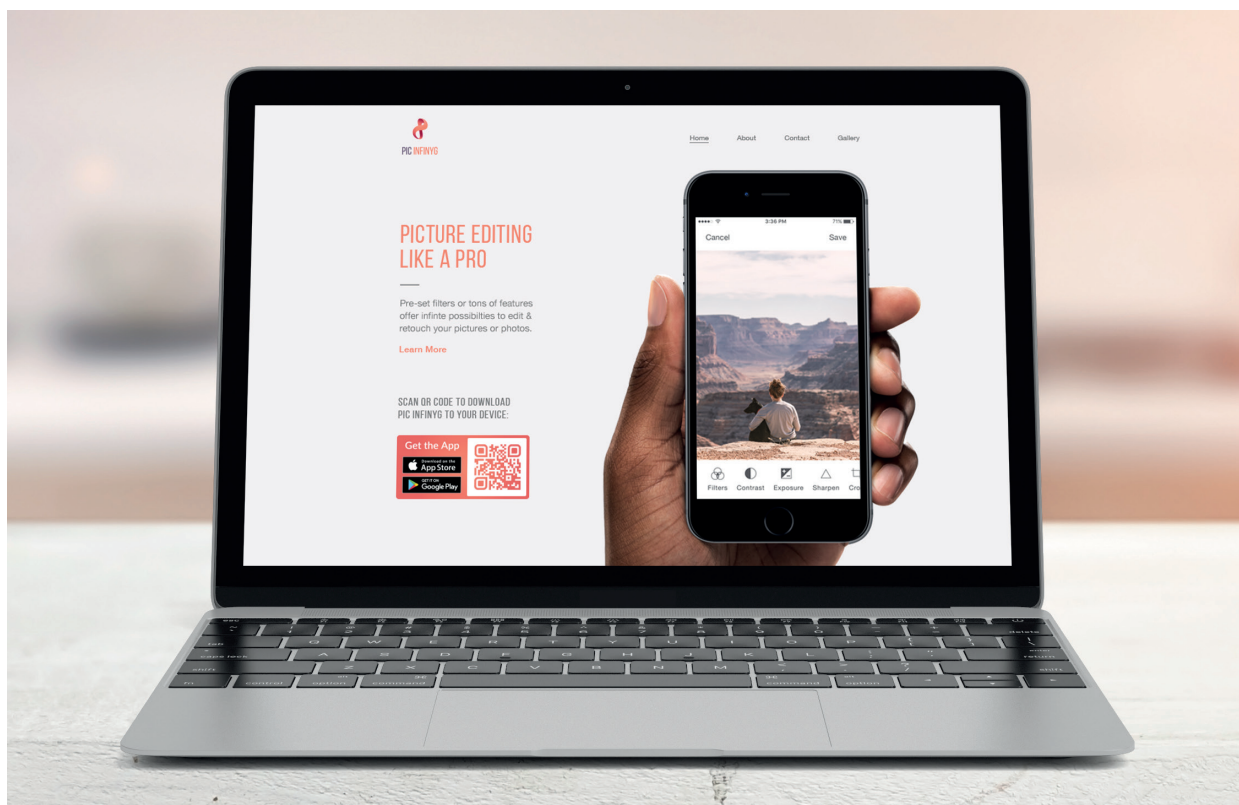

PLACE YOUR FRAMED QR CODE ON YOUR MARKETING MATERIALS

Integrate your framed QR Code into the design of your product packaging, flyer or poster. Optionally adapt your Code and Frame to your campaign design or company colors. Save the file and you're ready for printing!
